## Safety Around Water & Swim Lessons for Youth w/ Special Needs

A large percentage of children drown within 6-10 feet of safety. Most of these drownings happen because of a lack of basic water safety knowledge and skills. In this class students will learn to put basic skills together in a continuous movement pattern, or sequence. Learning sequences like Swim, Float, Swim and Jump, Push, Turn, Grab along with water safety topics will increase their knowledge around water.

The goal is to increase water safety knowledge to protect and ensure our child's safety around water in a fun way!

#### Preschool SAW (3yr-5yr)
