

# MATH

## BOOTCAMP

### WEDNESDAY & THURSDAY

5:30-7:30PM @ THE CENTENNIAL HILLS Y

#### WEDNESDAY

##### FOUNDATIONAL MIDDLE SCHOOL SKILLS

Join us as we focus on building foundational skills for middle schoolers, including elementary review and topics like negative numbers, linear equations, divisibility, exponents, transformations, dilations, and 3D geometry. Our program emphasizes mastering problem-solving strategies for all challenges, not just daily tasks, while tailoring support to each student's current academic needs.

#### THURSDAY

##### ENRICHMENT FOR 3RD-5TH GRADE & 6TH GRADERS WITH GAPS

Our lessons align with the CCSD math pacing guide and draw from multiple curriculums, including Envisions. We focus on foundational skills like fact families, place value, operations with decimals and fractions, and unit conversions. Emphasizing problem-solving beyond daily tasks, we tailor part of the program to address each student's current academic needs.

### 4 WEEK BOOTCAMP
